

Oxford on Rideau Tech – 2018 goals document

rev date: 31-Dec-2017

Goal Description: Prusa i3 MK2s 3D printer kit and assorted PLA materials

Reason for Goal: Prusa Research has raised the bar for consumer 3D printing platforms while not breaking the bank. And with its total score of 36 points — more than any machine we've ever tested — the Prusa i3 MK2 became the machine all the testers wanted, and more than one of us went home and immediately placed an order (quote from make magazine). 3D printing is used by many educators, for example: <https://www.youtube.com/watch?v=39sZftJd2Vw>

Further Information: <https://shop.prusa3d.com/en/3d-printers/59-original-prusa-i3-mk2-kit.html>

Breakdown of costs:

\$599.00 USD = Cost of Prusa i3 MK2S kit

\$83.96 USD = Cost of four spools of PLA material (various colors)

\$682.96 USD = Total of above items

\$810.05 USD = Cost plus shipping (127.09 for UPS)

\$1058.35 CDN = Cost of above converted from USD to CDN

\$1182.23 CDN = Final CDN cost including final import taxes (123.88 for taxes)

Goal Achieved
